

EDUCATION

B.E CSE (AIML) – Sri Eshwar College of Engineering CGPA: 7.8	2024–2028
HSC – Akshaya Academy Senior Secondary School 84.8%	2023–2024
SSLC – Akshaya Academy Senior Secondary School 74.8%	2021–2022

PROJECTS

Land Rover: 2025

- A rover which can move on a fixed path to go around in a loop and check for any complications in the water flow of an irrigation system setup in the farm it is made mainly for small and medium scale farmers it is made in small size and cost efficient as affordable by the small and medium scale farmers.

Crop Yield Prediction System (Machine Learning Project): 2026

- Developed a machine learning model to predict suitable crops and crop yield based on agricultural parameters such as soil nutrients (N, P, K), rainfall, temperature, humidity, and pH values. The dataset was preprocessed using Pandas and Label Encoding, and the model was trained using ensemble techniques including Random Forest with crossvalidation to improve prediction accuracy. The system achieved high accuracy on both training and testing datasets and was deployed using serialized models for fast prediction.

Tech Stack: Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Random Forest, Joblib, Kaggle Dataset.

Eye Disease Prediction System Using Deep Learning: 2026

- Developed an AI-powered web application for predicting eye diseases such as Cataract, Glaucoma, and Diabetic Retinopathy using a Convolutional Neural Network (CNN). Built the backend using Flask, integrated TensorFlow/Keras for deep learning, and implemented user authentication with SQLite database. The system allows users to upload eye images and receive disease predictions with confidence scores in real time.

INTERNSHIPS

EDUCENTRO PVT. LTD. – Full Stack Intern Dec 2025

- Completed structured internship training in MERN stack development through hands-on implementation of full-stack web applications, strengthening practical software engineering workflows and backend development concepts.
- Assisted in developing REST APIs, authentication systems, and MongoDB database schemas while gaining exposure to debugging, deployment, and version control workflows using Git, Vercel and Render.

CERTIFICATIONS

The MERN Fullstack Guide Udemy	2025
Introduction to C and C++ (for Beginners) Udemy	2025

ACHIEVEMENTS

Participated – DHRUVA (National Level Tech Fest – Paper Presentation), <i>Karpagam College of Engineering</i>	2025
Participated – DEV-SPARK (National Level Hackathon by IEEE), <i>KPRIET</i>	2025

CODING PROFILES

LeetCode: 20+ Problems Solved (Global Rank: 24,57,142)

SkillRack: 450+ Problems Solved

SKILLS

Programming: C, C++, Python, Java

Full-Stack Development: HTML, CSS, React.js, Express.js, Node.js, MongoDB, MySQL, PostgreSQL

Data Science: Pandas, NumPy, Matplotlib, Seaborn

Tools: Git, GitHub, Canva, Figma
